**New Plants,
New address!!**

Welcome to Van Vliet New Plants, your trusted partner in the world of plant varieties. We specialize in the introduction, exploitation, and management of new plant varieties that are protected by plant breeders rights. With our extensive experience and global network, we ensure that each variety reaches its full potential in the market.

Protection: At Van Vliet New Plants, we understand the importance of protecting new plant varieties. Our dedicated team works closely with plant breeders to secure plant breeders rights, safeguarding their intellectual property. By offering legal protection, we ensure that the innovative efforts of breeders are recognized and rewarded.

Control: We take pride in maintaining strict quality control measures to guarantee the excellence of our plant varieties. Through meticulous testing and evaluation, we ensure that every plant meets the highest standards before it is introduced to the market. Our commitment to quality control sets us apart and ensures customer satisfaction.

Marketing: With a comprehensive understanding of the market, we devise tailored marketing strategies for each plant variety. Our skilled team collaborates with a wide network of growers and wholesalers worldwide to identify the ideal market opportunities. By leveraging our marketing expertise, we maximize the visibility and profitability of every plant variety we manage.

Management: Van Vliet New Plants excels in the efficient management of plant varieties. From initial introduction to ongoing cultivation, we provide expert guidance and support throughout the lifecycle of each variety. Our dedicated team of advisors offers personalized solutions, enabling growers and wholesalers to optimize production and distribution.

Global Network: As a global player, we have established a vast network of partner agencies and advisors around the world. This expansive reach allows us to connect with (new) growers and wholesalers, ensuring that our plant varieties find their way into diverse markets. Through collaboration and partnerships, we foster growth and success on a global scale.

Choose Van Vliet New Plants for your plant variety needs. With our expertise in protection, control, marketing, management, and global networking, we are your reliable partner in introducing exceptional plant varieties to the market. Contact us today to explore the exciting possibilities that await your business.

The History of New Plants

2001

Where it all started back in 2001

2004

Number one in New Plants!

2010

Speak proudly between his New Plant

2015

The booth is becoming too small for all New Plants

25 year old plants, still going strong!

Sorbaria s. Sem

Hydrangea p. Limelight

Caryopteris c. Summer Sorbet

Coprosma Evening Glow

Ceanothus Blue Sapphire

25 years, time flies!

Who would have thought?

Late nineties I travelled with fellow growers to New Zealand. We saw a lot of genetics which weren't available in Europe.

So we brought some with us home, also we met John vander Elst, who already was a planthunter for novelties. After our first steps of trialing and protection, we founded Van Vliet New Plants in 2001. And now 25 years later, Van Vliet New Plants is managing 250 varieties, has more than a 100 varieties on trial.

In those 25 years, "we" introduced a lot of varieties that changed the market, and shook up the playing field.

What am I most proud of?

Hydrangea paniculata Limelight, we had young plants, but nobody wanted to trial them, because, the market was ok with grandiflora and "Kyushu", so we had to

give them away for free to trials, and before we even could visit the growers next year in summer, the phone turned red hot with everybody wanted to grow them.

What is the funniest anecdote?

In the early days, we were traveling in summer and selected some novelties, but because it was hot and we were on the road for multiple days, we put some bareroot plants in the hotelroom, in the bath with water... unfortunately the cleaning lady was not in to plants, and cleaned out our whole assortment, all thrown away. Good thing, we could freshen up for dinner that evening...

I am very proud of the history, and am looking with confidence to the future.

Sjaak

The future of New Plants

The next 25 years!

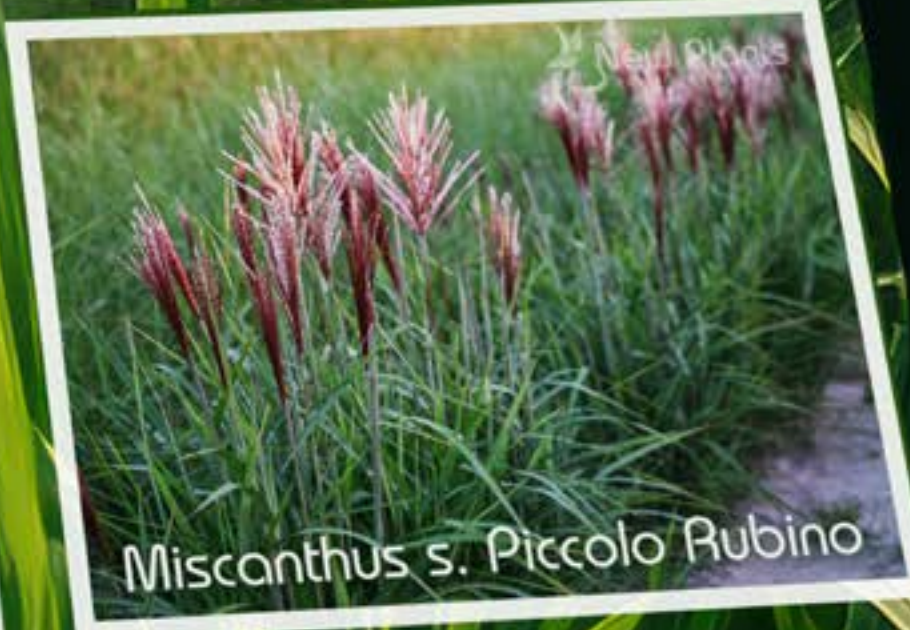

From just a few introductions every year to hundreds ...

The field of novelties changed a lot, more specialist breeders, less amateurs, it brings challenges, for one, for every good novelty the competitor is already bred. So the lifecycle is shorter. But because of the professional way of breeding, costs are higher.

The focus for us the next 25 years will be:

- Environment, finding stronger and healthier varieties, less to no chemicals needed.
- Climate, we see more and more excesses, drought, heat, floodings, so genetics need to be ready for that, more and more plants are coping with the heat, but also can stand the cold or the wet season.
- Margin for growers, plants who are easier to grow, plants who finish faster, plants who need less care (pruning)

We are always happy to visit you and see what you have bred, and see if this will fit the new demands of the market!

CONFERS

Conifers hold a special place in our assortment as one of the oldest product groups offered by Van Vliet New Plants. Our journey began 25 years ago when we emerged as a division of Gebr. van Vliet, which was a company with 40 years of expertise in cultivating grafted and non-grafted conifers.

Today, we take pride in our extensive collection of conifers, which includes well-known varieties such as **Thuja occidentalis 'Mirjam' (pbr)** (featured on page 108) and the rising star, **Thuja occidentalis 'King of Brabant' (pbr)** (on page 106).

Grasses

Grasses are a fairly new addition to our assortment, reflecting the popularity they have gained in recent years. It's easy to see why they have captured the hearts of gardeners and patio enthusiasts alike. Their versatility and appeal make them a fantastic choice for enhancing both gardens and patios.

Take a moment to explore our selection, including the most compact **Cortaderia** there is (on page 115) and discover our range of dancing **Cordylines** (on page 113). Many more grasses like Miscanthus and Pennisetum will be added to our assortment in the near future.

'Heron' PBR

Trees

Within our portfolio, we proudly feature an array of magnificent trees. One of our primary focuses lies in alley trees, like the series of colorful **Betula** varieties (on page 126). These stunning trees add a splash of color to any landscape. Additionally, our assortment

includes remarkable specimens like **Albizia julibrissin 'Tropical Dream' (pbr)** (on page 125), known for the improved frost hardiness. Explore our selection of trees and discover the perfect addition to your assortment.

A		C		R	
Acer pseudoplatanus	124	Carpinus betulus	127	Robinia	130
Albizia julibrissin	125	Cercidiphyllum japonicum	128
