

Buddleja Flutterby™ series

The *Buddleja* "Flutterby" series is a new compact series of Butterfly bushes that includes four different colors. "Flutterby's" are completely non invasive hybrids and will not re seed and become a nuisance like the common butterfly bushes seen widely in the landscape. These hybrids are also heavily reblooming since the plant does not put energy into seed production but into flower generation. Extensive research by various universities and governments has validated this fact. New flowers are continually produced once the older flowers begin to decline. First flowers will come in late spring, earlier than other cultivars. This series is heavily fragrant and attracts abundant birds and butterflies. "Flutterbys" will reach a height of 5 ft (1.5 meters) and a width of the same and has thrived in temperatures down to minus twenty, Fahrenheit (-29°C). Once established in the garden, these plants are very drought tolerant.

Van Vliet New Plants is specialized in introducing and managing new plants, protected by plant breeders rights (PBR) and has agencies all over the world. Ask for brochures of other special species from our extensive collection.

Buddleja

Buddleja davidii 'Pondaras #6'
PBR FLUTTERBY™ PEACE

Besides the general properties for the entire Flutterby™ series, *Buddleja davidii* Peace has some additional features. Peace keeps on producing large quantities of mauve-pink flowers until the first frost. The leaf of Peace has a deep dark green color.

EU applied for 2011 'Pondaras #6'
PP 22,142

Buddleja davidii 'Pondaras #11'
PBR FLUTTERBY™ LAVENDER

Also for Lavender the general properties for the entire Flutterby™ series apply. Besides that, *Buddleja davidii* Lavender produces a vast amount of two-colored fragrant flowers. Before these flowers open, they have a dark lavender color and once opened the color fades to a lighter lavender. The leaves of Lavender are gray-green and form a dense, compact shrub flowering very rich and for a prolonged time, until the first frost.

PPAF 2011 'Pondaras #11'
PP 22,067

Buddleja davidii 'Pondaras #9'
PBR FLUTTERBY™ PINK

All properties for the complete Flutterby™ series also apply to Pink. Moreover, *Buddleja davidii* Pink flowers heavily with large pink panicles, measuring up to 1.5 ft (45 cm) long and 4" (10 cm) wide. The mid-pink flowers point upright on the plant for a unique Nectar Bush display. The blooms do not shatter from handling and are also suitable as cut flowers. Pink has dark green foliage and continuously produces new flowers until the first frost.
