

Hydrangea quercifolia 'Ice Crystal'

Ice Crystal has exceptional deeply cut leaves and the remains extremely juvenile and bushy as a result of in vitro propagation. Behind glass 'Ice Crystal' flowers with creamy white flowers starting in May. Outside the flowers appear in June / July. 'Ice Crystal' has beautiful fall colors and is very hardy. It is resistant to drought, grows easily in pot or garden, and is at its best in large groups.

EU29648

Berberis thunbergii 'Maria'

Berberis thunbergii 'Maria' is a deciduous shrub of about one meter (3 ft). The young shoots are bright red in spring. Then the foliage is deeply yellow, only slightly fading in summer. Even on warm and sunny days, the foliage will not suffer from sun burn. 'Maria' is very mildew resistant. In autumn the foliage colors intensely orange.

Coloring Shrubs

Viburnum plicatum 'jww-1'
PBR KILIMANDJARO®

V*viburnum plicatum* Kilimandjaro grows like a pyramid that looks like the snow covered Kilimandjaro when it flowers with its white lacecap flowers. All four seasons long, Kilimandjaro is a special appearance.

It first flowers in May with large white lacecaps. After a growth period, Kilimandjaro will flower again late summer with bright white flowers. Between the two flowering seasons, the flowers turn into red berries that slowly color black. Last but not least, Kilimandjaro has a beautiful autumn coloration with warm red and yellow tones.

Sorbus aucuparia 'Flanrock'
PBR AUTUMN SPIRE®

S*orbus aucuparia* Autumn Spire has a fastigiate growth habit, even at early age. The pinnate leaves are dark green and have a deep purple color in the fall. Autumn Spire flowers in spring with white flowers in flat screens, followed by yellow-orange berries in autumn. Autumn Spire is very hardy and an absolutely fantastic street tree.

Ginkgo biloba 'Menhir'

G*inkgo biloba* 'Menhir' is what the name suggests, a slender upright columnar tree which forms a nice straight tree without having to tie it up. Already in a young stage 'Menhir' has a steady and strong growth. The foliage of 'Menhir' is nicely carved and has a gray-blue color. In autumn the Ginkgo colors yellow and keeps that color for a long time. 'Menhir' is resistant to diseases and grows in any soil type.

Hydrangea 'Veerle'

Already very early in the season, *Hydrangea* 'Veerle' will flower in pink or blue, depending on the soil. The lacecap flowers consist of fertile and sterile flowers. After pollination, the sterile flowers pivot down and color old-pink. Even in cold areas, 'Veerle' flowers very reliable. Because of its early flowering 'Veerle' can give a second bloom when it is cut back immediately after the first bloom. In autumn the green leaves of 'Veerle' color from wine red to deep purple. Planted in large groups 'Veerle' creates an astonishing sight.

Hydrangea 'Veerle' is a seedling of *Hydrangea serrata* ssp. *yezoensis*, the most northerly growing Japanese *Hydrangea*, and is therefore very hardy.
