Hydrangea

Hydrangea paniculata 'Levana'

The main feature of *Hydrangea paniculata* 'Levana' are the enormous, up to 20" (50 cm) long, panicles. The pure white flowers measuring about 2" (5 cm) across, grow at the end of up to 7 ft (2 m) long, remarkably sturdy twigs. The flowers of 'Levana' consist of four or five well separated sepals that appear like stars around the flower panicles in July and August. The giant mass of fragrant white flowers attracts many insects. 'Levana' is a very healthy plant, not suffering from diseases. It likes a sunny spot and can be planted as a solitary plant but can just as well be planted in larger groups. The flowers of 'Levana' are also ideal cut flowers.

EU applied for 2009/2748

Hydrangea paniculata 'Limelight'

Hydrangea paniculata 'Limelight' flowers from the second half of the summer into autumn with elegant creamy white to lime-colored flowers. The bushy flowers have sturdy branches that do not tip over, even after a heavy rain shower. 'Limelight' flourishes on new wood and is a fully hardy and carefree plant. Firm annually pruning reinforces blooming.

EU5211

Hydrangea paniculata 'Candle Light'

Hydrangea paniculata 'Candle Light' has beautiful creamy white flowers at the end of sturdy twigs. These twigs are colored nicely dark red and give the shrub an exclusive look. 'Candle Light' is hardy and has a strong and upright growth.

EU applied for

Hydrangea 'Veerle'

Already very early in the season, *Hydrangea* 'Veerle' will flower in pink or blue, depending on the soil. The lacecap flowers consist of fertile and sterile flowers. After pollination, the sterile flowers pivot down and color old-pink. Even in cold areas, 'Veerle' flowers very reliable. Because of its early flowering 'Veerle' can give a second bloom when it is cut back immediately after the first bloom. In autumn the green leaves of 'Veerle' color from wine red to deep purple. Planted in large groups 'Veerle' creates an astonishing sight. *Hydrangea* 'Veerle' is a seedling of *Hydrangea serrata* ssp. *yezoensis*, the most northerly growing Japanese *Hydrangea*, and is therefore very hardy.
